avant garde poetry in the antipodes causes all sorts of trouble for literary history it is an avant garde that seems to arrive too late and yet right on time in 1897

christopher brennan made his own version of un coup de des the same year mallarme published it in cosmopolis in the 1940s the same period avant gardism was declared dead or fatally injured due to the ern malley affair harry hooton began writing a significant body of experimental poetry from the 1950s to the 1970s australian dada emerged belatedly through figures like jas h duke tristan tzara had previously sung aboriginal songs at the cabaret voltaire in 1916 first nations and migrant poets then began reinventing avant garde poetry in the twentieth and early twenty first centuries this book maintains that such a confounding literary history poses a distinct challenge to the theories of the avant gardes we have become accustomed to and changes our perspective of avant garde time

unravelling aerial mysteries of the past charles fort published his first and most influential book the book of the damned a century ago in 1919 collecting together many historical reports of strange aerial phenomena since the birth of the ufo controversy in 1947 fort s writings have been cited in countless books and web pages yet this is the first time in a hundred years that researchers have systematically verified the sources and content of every one of these oft recycled stories correcting many errors placing each case in its historical context and submitting it to a careful scientific investigation in an attempt to find a conventional answer what were these reported phenomena is it possible to find non exotic explanations with the advantage of modern knowledge methods and resources in most cases the answer proves to be yes some of the solutions found may shock the general reader and surprise even specialists yet in the end a few well documented events remain unexplained

resulting in the birth of the first known civilizations including rare material from the archives of charles hapgood albert einstein and dwight d eisenhower the flem aths explain how an earth crust displacement could happen again in the future perhaps in correspondence with high solar activity with new scientific genetic and linguistic evidence in support of antarctica as the location of long lost atlantis this updated edition convincingly shows that atlantis was not swallowed by the sea but was entombed beneath miles of polar ice
